Who Will Be Our New Communities Beyond 2012...?

Are we already in the midst of interaction and communication with consciousness of other star systems? Are we inherently capable of extradimensional interaction? Exploring the ethos of Universal loves, passions, discoveries, driving desires for Universal creative connections.

Can we understand ourselves as part of the heart of the Earth, of Solar life consciousness; can we communicate *as* Earth? Can we understand our bodies, souls, hearts *as space ships and time machines*...? Can we be both creators and receivers in space with new understanding that

WE ARE ALL EXTRATERRESTRIAL

...all from "star stuff," from the first Star of the Universe...?

A learning practice to activate "celestial mind," creativity/perception/genius at deeper levels, thinking beyond time: ending the sense of "*alienation*," rethinking "female," "male," "divine," "love," "gratitude," "life" across space-time.

What happens in the class?

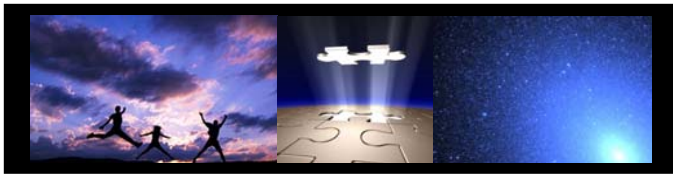

The class includes meditation, intuitive exercises and remote viewing--and beautiful sound toning with crystal sound which increases abilities to reach deep levels of relaxation and telepathic understanding. Some discussions and exercises for thought are enormous "fun" and entertaining; others "profound." Those who have never meditated, teenagers and young adults should feel equally comfortable in the class.

Who is it for? Everyone! The curious seeker, meditator, explorer of deeper spiritual meaning, --and the scientist or technology thinker, science fiction/UFO buff, creative writer/musician/artist/performer/film-maker, psychologist, astrologist, teacher/parent seeking new human creativity and thought.

“Star Talk”...

From the creator of Parallel Universe and Right Brain Aerobics -- Sandra H. Rodman...

Some Benefits of “Star Talk” practices...

- Learning Interplanetary Meditations which can be affirming, increase a sense of well-being and personal empowerment, an expanded "self"/identity and reconnection across time-space; or this might be thought of as a “thought experiment,” consciousness exploration outside of normal paradigms, using the brain differently
- Expanded, more multidimensional and creative communication skills especially in unfamiliar or stressful circumstances or experiences such as “UFO sightings,” which challenge the sense of time-space and boundary
- Learning practices to increase intuitive-telepathic-sensory awareness skills, deepen and expand abilities of altered state consciousness, knowledge of right brain "Creative Speed Writing" and right brain Remote Viewing
- Increased sense of empathy, gratitude, and cross-cultural understanding which can impact daily life as well as prepare us for understanding, perceiving, and communicating with non-Earth-based energies; sharing insight and perceptual knowledge gained from multidimensional experiences
- Increased self-confidence to respond or act more appropriately in unexpected or "unreal" situations with less fear, a greater sense of understanding our place in a larger universe; a serious consideration of what might be the depths of our feelings and state of mind if faced with interaction with non-Earth life forms
- Increased ability to perceive sparks of insight and creativity beyond boundaries of space-time in the mind; increased ability to “envision” larger vistas across identity-space-time constructs; to perceive more accurately
- Increased "paradigmatic" understanding and mental acumen when fundamental aspects of reality are challenged, e.g., incomprehensible changes in Earth climate, economic change and other developments which challenge identity: sightings of UFOs, SETI projects, experiences reported by others which do not seem to “make sense”; increasing one’s sense of the self as the universe becoming more, knowing more, seeking new territory

Confidential, Affirmative

A private, affirmative class for the avid learner, the curious seeker who wants to explore thought and consciousness outside the time-space box. We will respect others, honor the confidentiality and experiences of others as we would like our own respected. (You can even attend using a “nickname.”) In general we use the words extraterrestrial, non-Earth, etc. to describe life which is not of terrestrial origin--instead of the self-limiting/distancing concept of “alien” for beings outside of Earth or outside of local Earth/country borders, seeking to develop greater respect and expansiveness in our communication. **The class environment is one of peace, honoring, and affirmation.**
